Trainee Portal

Service Testing & Demo Assignments

Domain owners: Communication, Certificates & Reports, Settings, Payments

5 testers · 26 models covered · 155 services to verify

Purpose of This Round

The backend for the Trainee Portal is fully implemented. This document assigns each tester a set of already-built service groups - organized exactly as they appear in the original portal requirements - to verify end-to-end ahead of the backend demo. This is a **testing and validation pass, not new implementation work**: confirm each endpoint behaves correctly against the seeded test data, note anything broken or unclear, and be ready to demonstrate your group live. The same grouping and ownership will carry forward into the frontend phase.

Tester	Assigned Service Groups	Services
Al Anoud	Home Page, Training Program, Sessions Context	53
Shrouq	Tasks & Projects, Payments, Evaluations	39
Manar	Personal Profile, Communication & Support, Announcements	32
Zahraa	Attendance	15
Malak	Alerts & Warnings, Achievements & Certificates	16

How to test each service

- Confirm the happy path first (valid input -> expected 200/201 and correct payload shape), then test edge cases: invalid IDs (404), missing required fields (400), and nullable fields both populated and null.
- Cross-check results against the seeded data in `Nafadh_Seed_Data.sql` - every tip below references specific seeded IDs so you're not guessing at expected values.
- For list endpoints, verify filters actually filter (e.g. by status, by date range) rather than silently returning everything.
- Where an endpoint's description mentions a calculation (compliance rate, progress %, weight totals), verify the number returned is arithmetically correct against the underlying rows, not just present.
- Log anything broken, slow, or ambiguous - this feedback goes directly into the demo script and the frontend team's integration notes.

Testing tips for this assignment

- *This is the heaviest group - consider anchoring your whole demo on one walkthrough trainee. Trainee 1 has 2 enrollments (Batch 1 and Batch 4), making them a rich single example.*
- *Module prerequisite gating is directly user-facing here - a great centerpiece moment to show the trainee genuinely can't skip ahead.*

Home Page

Aggregate/summary screen only - pulls read data from the groups below rather than owning dedicated CRUD endpoints. Use it as your opening walkthrough screen before moving into your groups.

Training Program

Program

Method	Endpoint	Business Functionality
GET	/api/Program	List programs (filter by track/status/category)
GET	/api/Program/{id}	Get program details
POST	/api/Program	Create a new program
PUT	/api/Program/{id}	Update program details
DELETE	/api/Program/{id}	Archive a program
GET	/api/Program/{id}/batches	List batches running for a program
GET	/api/Program/{id}/modules	Get the curriculum outline (modules)
GET	/api/Program/{id}/eligible-companies	List companies eligible to host this program

Batch

Method	Endpoint	Business Functionality
GET	/api/Batch	List batches (filter by program/status/date range)
GET	/api/Batch/{id}	Get batch details
POST	/api/Batch	Create a new batch/cohort
PUT	/api/Batch/{id}	Update dates/capacity/status
DELETE	/api/Batch/{id}	Cancel a batch
GET	/api/Batch/{id}/trainees	Roster of trainees enrolled in a batch
GET	/api/Batch/{id}/capacity	Capacity vs. enrolled count (Admin KPI)

Module

Method	Endpoint	Business Functionality
GET	/api/Module/program/{programId}	Ordered module list for a program (curriculum outline)
GET	/api/Module/{id}	Get module details
POST	/api/Module	Create a module (with prerequisite gating)
PUT	/api/Module/{id}	Update order/availability window/archive flag
DELETE	/api/Module/{id}	Remove a module
GET	/api/Module/{id}/lessons	Lessons inside a module
GET	/api/Module/{id}/is-unlocked/{traineeId}	Check prerequisite completion for gating

Lesson

Method	Endpoint	Business Functionality
GET	/api/Lesson/module/{moduleId}	Lessons in order for a module
GET	/api/Lesson/{id}	Get lesson content
POST	/api/Lesson	Create a lesson

Method	Endpoint	Business Functionality
PUT	/api/Lesson/{id}	Update lesson content/order
DELETE	/api/Lesson/{id}	Remove a lesson

TrainingMaterial

Method	Endpoint	Business Functionality
GET	/api/TrainingMaterial/lesson/{lessonId}	Materials attached to a lesson
POST	/api/TrainingMaterial	Attach a file/video/link to a lesson
PUT	/api/TrainingMaterial/{id}	Update material metadata
DELETE	/api/TrainingMaterial/{id}	Remove a material
GET	/api/TrainingMaterial/{id}/download	Retrieve a file for download/stream

TraineeModuleProgress

Method	Endpoint	Business Functionality
GET	/api/TraineeModuleProgress/trainee/{traineeId}	A trainee's progress across all modules
POST	/api/TraineeModuleProgress/complete	Trainee marks a module complete
PUT	/api/TraineeModuleProgress/{id}	Update a progress record's status
GET	/api/TraineeModuleProgress/trainee/{traineeId}/percentage	Overall progress % (dashboard headline number)
GET	/api/TraineeModuleProgress/module/{moduleId}	Completion status across all trainees (trainer view)

Enrollment

Method	Endpoint	Business Functionality
GET	/api/Enrollment	List enrollments (filter by batch/trainee/company/status)
GET	/api/Enrollment/{id}	Get enrollment details
POST	/api/Enrollment	Enroll a trainee into a batch/company/department
PUT	/api/Enrollment/{id}	Update department/supervisor assignment
PUT	/api/Enrollment/{id}/status	Update completion status (InProgress/Completed/Dropped/Failed)
DELETE	/api/Enrollment/{id}	Cancel/withdraw an enrollment
GET	/api/Enrollment/trainee/{traineeId}	All enrollments for a trainee ("My Programs")
GET	/api/Enrollment/company/{companyId}	All enrollments hosted by a company
GET	/api/Enrollment/{id}/progress-summary	Aggregated progress % for dashboards

Sessions Context

Session

Method	Endpoint	Business Functionality
GET	/api/Session	List sessions (filter by batch/trainer/date)
GET	/api/Session/{id}	Get session details
POST	/api/Session	Schedule a new session
PUT	/api/Session/{id}	Update topic/link/recording/objectives
PUT	/api/Session/{id}/status	Mark completed/cancelled/postponed
DELETE	/api/Session/{id}	Remove a scheduled session
GET	/api/Session/batch/{batchId}/calendar	Full session calendar for a batch

TESTER

Shrouq

Testing tips for this assignment

■ *Trainee 1's TraineePayment is fully Paid (all 3 installments) while Trainee 2's is only PartiallyPaid (1 of 3) - use both to demo the different payment-schedule UI states.*

Tasks & Projects

Task

Method	Endpoint	Business Functionality
GET	/api/Task	List tasks (filter by batch/status/priority)
GET	/api/Task/{id}	Get task details
POST	/api/Task	Create a new task/assignment
PUT	/api/Task/{id}	Update task details
DELETE	/api/Task/{id}	Remove/cancel a task
GET	/api/Task/batch/{batchId}	Tasks for a batch ("My Tasks")
GET	/api/Task/{id}/rubrics	Grading rubric for a task
GET	/api/Task/{id}/submissions	All submissions received for a task

Submission

Method	Endpoint	Business Functionality
GET	/api/Submission/task/{taskId}	All submissions for a task (grading queue)
GET	/api/Submission/trainee/{traineeId}	A trainee's submission history
GET	/api/Submission/{id}	Get submission details
POST	/api/Submission	Trainee submits a task deliverable
PUT	/api/Submission/{id}/grade	Grade a submission (score + feedback)
PUT	/api/Submission/{id}/reopen	Reopen a submission for revision

Project

Method	Endpoint	Business Functionality
GET	/api/Project	List projects (filter by program/status)
GET	/api/Project/{id}	Get project details
POST	/api/Project	Define a new capstone/group project
PUT	/api/Project/{id}	Update project details
DELETE	/api/Project/{id}	Remove a project
GET	/api/Project/program/{programId}	Projects defined under a program

ProjectMember

Method	Endpoint	Business Functionality
GET	/api/ProjectMember/project/{projectId}	Team roster for a project
POST	/api/ProjectMember	Add a trainee to a project team (assign role)
PUT	/api/ProjectMember/{id}	Change a member's role (Lead/Contributor)
DELETE	/api/ProjectMember/{id}	Remove a trainee from the team

Method	Endpoint	Business Functionality
GET	/api/ProjectMember/trainee/{traineeId}	A trainee's project participation history

Payments

TraineePayment

Method	Endpoint	Business Functionality
GET	/api/TraineePayment/enrollment/{enrollmentId}	Billing record for a trainee's enrollment
GET	/api/TraineePayment/{id}	Payment details with schedule
POST	/api/TraineePayment	Create a trainee billing record
PUT	/api/TraineePayment/{id}/status	Update overall payment status

TraineePaymentSchedule

Method	Endpoint	Business Functionality
GET	/api/TraineePaymentSchedule/payment/{traineePaymentId}	Installment schedule for a payment
POST	/api/TraineePaymentSchedule	Generate monthly installments
PUT	/api/TraineePaymentSchedule/{id}/mark-paid	Record a paid installment
GET	/api/TraineePaymentSchedule/overdue	Overdue installments report

Evaluations

Evaluation

Method	Endpoint	Business Functionality
GET	/api/Evaluation/enrollment/{enrollmentId}	All evaluations for a trainee's enrollment
GET	/api/Evaluation/trainer/{trainerId}	All Admin evaluations of a trainer
GET	/api/Evaluation/{id}	Get evaluation details
POST	/api/Evaluation	Record a new evaluation (trainee or trainer, via a template)
PUT	/api/Evaluation/{id}	Update score/notes
GET	/api/Evaluation/enrollment/{enrollmentId}/average	Average score across periods

TESTER

Manar

Team 4 | Trainee Portal

3 service group(s) · 32 services to verify

Testing tips for this assignment

■ Trainee 7 has 'PendingVerification' user status and no CompanyId - a good 'new/unplaced trainee' profile state to demo.

■ All 3 announcement scope types are seeded (Platform/Batch/Company) - confirm a trainee only sees the ones relevant to their own batch/company, plus the platform-wide one.

Personal Profile

User

Method	Endpoint	Business Functionality
POST	/api/User/register	Create a new user account
POST	/api/User/login	Authenticate and issue an access token
GET	/api/User/{id}	Get user profile
PUT	/api/User/{id}	Update profile
PUT	/api/User/{id}/status	Activate/suspend/deactivate a user
PUT	/api/User/{id}/reset-password	Admin-triggered password reset
GET	/api/User	List/search users (filter by role/status)
GET	/api/User/{id}/permissions	Effective permissions for a user (via role)
DELETE	/api/User/{id}	Deactivate an account (soft-delete)

Trainee

Method	Endpoint	Business Functionality
GET	/api/Trainee	List/search trainees (filter by company/status/university)
GET	/api/Trainee/{id}	Trainee profile
POST	/api/Trainee	Register a trainee profile
PUT	/api/Trainee/{id}	Update profile (skills/resume/academic info)
PUT	/api/Trainee/{id}/status	Activate/graduate/drop a trainee
PUT	/api/Trainee/{id}/assign-company	Place a trainee with a host company
GET	/api/Trainee/{id}/dashboard-summary	Aggregated home-page data for the trainee portal
POST	/api/Trainee/import	Bulk-import trainees from Excel

Communication & Support

Message

Method	Endpoint	Business Functionality
GET	/api/Message/conversation/{userId1}/{userId2}	Message thread between two users
GET	/api/Message/inbox/{userId}	A user's received messages
POST	/api/Message	Send a direct message
PUT	/api/Message/{id}/status	Update delivery/read status
GET	/api/Message/user/{userId}/unread-count	Unread message badge count

SupportTicket

Method	Endpoint	Business Functionality
GET	/api/SupportTicket/user/{userId}	A user's ticket history
GET	/api/SupportTicket/{id}	Get ticket details/thread
POST	/api/SupportTicket	Open a new support ticket
PUT	/api/SupportTicket/{id}/status	Update status (InProgress/Resolved/Closed)
GET	/api/SupportTicket/open	Authority's open tickets queue

Announcements

Announcement

Method	Endpoint	Business Functionality
GET	/api/Announcement/scope/{scopeType}/{scopeId}	Announcements for a batch/company/platform
GET	/api/Announcement/{id}	Announcement details
POST	/api/Announcement	Publish a broadcast announcement
PUT	/api/Announcement/{id}	Edit an announcement
DELETE	/api/Announcement/{id}	Retract an announcement

TESTER

Zahraa

Testing tips for this assignment

■ *The Present/Present/Late/Absent/Present pattern repeats for every enrollment. Enrollment 3's Absent day has an Approved excuse, Enrollment 9's has a Pending one, and Enrollment 12's has a Rejected one - a great trio for demoing all 3 excuse outcomes from the trainee's side.*

Attendance**DailyAttendance**

Method	Endpoint	Business Functionality
GET	/api/DailyAttendance/enrollment/{enrollmentId}	Attendance history for an enrollment
POST	/api/DailyAttendance/check-in	Record a trainee's on-site check-in
PUT	/api/DailyAttendance/{id}/check-out	Record a trainee's check-out
PUT	/api/DailyAttendance/{id}	Correct a day's status/note/late flag
GET	/api/DailyAttendance/company/{companyId}/today	Today's attendance sheet (supervisor view)
GET	/api/DailyAttendance/enrollment/{enrollmentId}/compliance-rate	Attendance compliance % for dashboards

SessionAttendance

Method	Endpoint	Business Functionality
GET	/api/SessionAttendance/session/{sessionId}	Attendance roster for a session
POST	/api/SessionAttendance/mark	Trainer marks attendance (bulk) for a session
PUT	/api/SessionAttendance/{id}	Update a trainee's status/note
GET	/api/SessionAttendance/trainee/{traineeId}	A trainee's session attendance history
GET	/api/SessionAttendance/session/{sessionId}/rate	Attendance rate for a session

Excuse

Method	Endpoint	Business Functionality
GET	/api/Excuse/attendance/{dailyAttendanceId}	Excuse tied to an attendance gap
POST	/api/Excuse	File an excuse request
PUT	/api/Excuse/{id}/review	Approve or reject an excuse (Company/Authority)
GET	/api/Excuse/pending	Pending excuses review queue

TESTER

Malak

Team 4 | Trainee Portal

Testing tips for this assignment

■ Only Enrollments 1 and 4 have certificates issued (Completion and Excellence types respectively) - every other trainee should correctly show 'no certificate yet'.

■ Warnings are seeded against Enrollments 3, 6, and 9 (Trainees 7, 8, and 9) - use one of those three accounts to demo the trainee-facing warning view.

Alerts & Warnings

Warning

Method	Endpoint	Business Functionality
GET	/api/Warning/enrollment/{enrollmentId}	Warnings on a trainee's enrollment
GET	/api/Warning/{id}	Get warning details
POST	/api/Warning	Raise a new warning (Trainer/Supervisor)
PUT	/api/Warning/{id}/status	Update status (UnderReview/Resolved/Escalated)
PUT	/api/Warning/{id}/resolve	Close a warning with a resolution (Authority)
GET	/api/Warning/pending	Authority's open warnings queue
GET	/api/Warning/level/{level}	Filter warnings by severity level

Notification

Method	Endpoint	Business Functionality
GET	/api/Notification/user/{userId}	A user's notifications (unread first)
POST	/api/Notification	Create a system-generated notification (usually internal)
PUT	/api/Notification/{id}/read	Mark a notification as read
PUT	/api/Notification/user/{userId}/read-all	Mark all notifications as read
GET	/api/Notification/user/{userId}/unread-count	Unread badge count

Achievements & Certificates

Certificate

Method	Endpoint	Business Functionality
GET	/api/Certificate/enrollment/{enrollmentId}	Certificates issued for an enrollment
POST	/api/Certificate	Issue a certificate on completion
GET	/api/Certificate/{id}/download	Download a certificate file
GET	/api/Certificate/trainee/{traineeId}	All certificates earned by a trainee
